## Taking Part in Pavana Jaldindi

Pune, Maharashtra | January, 2023

28 students from S.B. Patil Public School took part in Pavana Jaldindi so as to know how water is polluted because of waste thrown by the people in Pavana River. And also to do a water conservation skit as well as a survey of how much the Pavana River is being polluted.

The students presented their perspectives and ideas on water conservation. The parents of

some students also participated in the Pavana Jaldindi activity.

The students were presented with a wide range of useful information from the guests present at the event and were shown the real perpetrators of water pollution. **Video Link 1: Guest Lecture** 

By the end of the activity, students were able to: understand how important it is to save river water

from pollution; and send the message to everyone that the biggest cause of water pollution is not only factories but also all of us who are responsible for polluting water bodies in different ways.

## **Further Evidences**
