

Dispose it Right: The E-Waste Collection and Recycling Activity

Pune, Maharashtra | 25th January, 2024

S.B. Patil Public School has always emphasised the importance of Green and CSR activities as it understands that service to society is through everyday eco-friendly activities.

Thus, students from Grade I to XII collected e-waste and brought it to the school. Every floor in the school had

boxes or bins for collecting the e-waste. Students from each floor brought e-waste from their homes and submitted it in these boxes.

On 25th January, 2024, the school

authorities submitted all the waste collected to the Poornam Ecovision Foundation situated at Sinhgad Road, Pune. Poornam EcoVision's aim is to provide holistic solutions to the environmental problems; and is a social enterprise committed to betterment of society and environment. This practice has been followed for the past three to four years in

our school and we hope to continue it further.

Through this activity, we were able to collect and recycle seven to eight boxes of e-waste appropriately to the Poornam EcoVision Foundation. instead of throwing it away. And through this, students not only contributed towards betterment of the environment and nature but were made aware about the impact of e-waste and spread awareness by collecting it. They further developed a sense of kindness and care by taking such small steps towards conserving the environment.
