
All About Micro:bit:

A Discussion with Alumnus, Amey Ajgar

Pune, Maharashtra | 9th September, 2023

The BBC micro:bit is an award-winning programmable device that allows students to get hands-on with coding and digital making. Use it to inspire your students to recognise the power of technology in the real world.

On 9th September, 2023, Amey Ajgar, an alumnus of S.B. Patil Public School - who has also started his own tech-company, Skillelectronics – and is deeply invested in micro:bit and its applications – visited school to have a one-on-one discussion with our principal, Dr. Bindu Saini.

The discussion was about organising an orientation programme for students about micro:bit and its applications, and its formal announcement at Avishkar 2023, an inter-school science event that will be held in the mid of October. They further discussed about proposing a “Youth Research Programme” that would be aimed at teaching students how to conduct research. The deliberation proved positive as Dr. Saini showed great interest bringing all said to fruition.

We are thankful to Amey for lending us his time and bringing this great opportunity to our doorstep.
