
Faculty Green Initiative: Growing a Greener Tomorrow

Pune, Maharashtra | 18th July, 2026

S.B. Patil Public School has always encouraged students to celebrate their birthdays meaningfully by donating a book or a plant to the school, nurturing a culture of environmental awareness and social responsibility. Taking this vision a step further, a new initiative was launched on 18th July, 2026 under the mentorship of Principal Dr. Bindu Saini, inviting faculty members to donate a plant to the school on the occasion of their birthdays.

This thoughtful initiative reflects the school's commitment to sustainability and environmental stewardship. Every plant donated contributes to a greener campus while inspiring the entire school community to embrace eco-conscious practices. By transforming birthdays into opportunities to give back to nature, S.B. Patil Public School continues to cultivate responsible citizens who understand that small actions can create a lasting positive impact on society and the environment.
