

The Global Forest Forum: Raising Awareness through Creative Expression

Pune, Maharashtra | 7th November, 2025

As part of the RIDS (Recognition of an International Dimension in Schools) programme, on 7th November, 2025, the students of Grades IV and V at S.B. Patil Public School participated in The Global Forest Forum — an engaging initiative aimed at fostering awareness about endangered species and the need for their conservation.

The activity revolved around the theme 'Human Interaction with Life on Land', encouraging learners to explore the relationship between people and the natural world across three countries — India, South Korea, and Dubai.

Students of Grade IV focused on flora, creating vibrant posters and thought-provoking slogans that depicted endangered plant species and the importance of preserving green life on our planet. Meanwhile, Grade V students turned their attention to fauna, illustrating the struggles faced by endangered animals and the critical need for their protection.

Through this creative exercise, students not only expressed their artistic abilities but also developed a deeper understanding of biodiversity, sustainability, and environmental responsibility. The activity inspired them to reflect on the human role in shaping the health of ecosystems and to advocate for a more balanced coexistence with nature.

Such initiatives continue to empower our young learners to become responsible global citizens who recognise the urgency of conservation and the power of awareness in driving change.

Would you like me to make it more press release-style (for publication or official reports) or magazine-style (more narrative and reader-friendly)?
