

The Primary Section Community Helpers Activity

Pune, Maharashtra | 4th September, 2023

On 4th September, 2023, a Community Helpers activity was carried out so as to broaden the children's horizons and help them understand the world outside their homes specifically about community helpers: people whose services are of immense value to society. The objectives also included stimulating the students' imagination and enhance their social development skills.

Students donned costumes and used props as part of their narratives. They dressed up as policemen, doctors, soldier, teachers, pilots, etc. Students described each character's role in two to three lines. They presented their views happily emphasizing how proud they were to be dressed as community helpers and how they loved their jobs.

Mid-session, a quiz was incorporated which further aroused the excitement of the students. They enthusiastically participated in the quiz. The session ended with nursery rhyme videos on community helpers being displayed for all to learn via play way.

We thank all the teachers and faculty members for working with our students and mentoring them to learn the tasks and jobs our community helpers undertake with the message of gender equality strongly emphasised as well.
