

Understanding Life on Land: Learning about SDG 15

Pune, Maharashtra | 20th September, 2023

In the month of September 2023, another life skill class based on the United Nation's SDGs was conducted for the students of Grade IV with the topic "Life on Land".

About Goal 15

The aim of the SDG is to Global Goals.

Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests.

Procedure

A detailed explanation of the UN's SDG Goal: Life on Land was given by the teachers. Students then discussed how one can make the earth a beautiful place to live for everyone. They all went on to draw pictures of life on land and write slogans about saving our earth. Students even engaged in riddles on guessing fruits' names.

Learning Outcomes

Students learned the following:

1. The importance of protecting and saving our environment, its ecosystem: all the flora and fauna.
2. To enhanced ways of living that do not cause harm to the environment.
3. To save our non-renewable resources for the future and use renewable energy sources such as solar power, water and wind.
