
A Visit by the Members of the Fire Station

Pune, Maharashtra | 6th January, 2025

On 6th January, 2025, members from the fire station visited our school with the objective to enhance visual learning and crisis-handling abilities among children. The motto behind this educational visit was to help students understand the work done by the fire fighters.

Fire safety training educates a set of practices and procedures to minimise the destruction caused by fire hazards. The skill and knowledge acquired through these trainings equip the learners to combat fire in any unanticipated fire breakout.

Students of Grade V were briefed by the officers on how to contact the fire authorities in case of an emergency by dialling 101. A demonstration drill was also conducted to explain the whole process of fire elimination. They even gave the message to give way on the road when we listen to the fire

brigade siren which was very informative for all of us.

Students were exposed to different techniques to extinguish the fire. Students gained knowledge about different types of fire extinguishers. Fire fighters demonstrated different water hoses used for firefighting. Different parts of the fire engine were shown. They watched how firefighters use their fire trucks in an emergency.

Our children asked many questions to the firefighters. The fire fighters were surprised by the inquisitiveness of our children. It was a fun-filled, informative experience for our children. The trip created a powerful impact on students as they witnessed the workings of the rescue operations.
