## Up, Up, and Learning: The Grades III to V Kite-making Activity

Pune, Maharashtra | 13<sup>th</sup> January, 2026

With great enthusiasm, students set about designing, assembling, and decorating their kites, transforming simple materials into vibrant, personalised creations. The classroom buzzed with excitement as imagination took flight — quite literally — while learners experimented with shapes, colours, and patterns.

The kite-making session also encouraged teamwork, collaboration, and peer learning, as students exchanged ideas, assisted one another, and proudly showcased their finished kites. The sense of accomplishment on their faces reflected the joy of creating something tangible through their own effort.

Overall, the activity successfully blended creativity with experiential learning, making education interactive, enjoyable, and impactful. It was heartening to witness students take pride in their colourful creations and share their excitement with friends, turning an ordinary school day into a celebration of learning and imagination.

Students of Grades III to V at S.B. Patil Public School participated in an engaging and joy-filled kite-making activity on Tuesday, 13<sup>th</sup> January, 2026. Designed as a hands-on learning experience, the activity aimed to foster creativity, strengthen fine motor skills, and introduce students to the basic principles behind the science of flight.

With

Beyond

the creative aspect, the activity offered valuable scientific insight. Students were introduced to how aerodynamics, balance, and air resistance influence the flight of a kite, helping them connect theory with real-world application. Learning unfolded naturally through observation, discussion, and exploration, making the experience both meaningful and memorable.
