
Towards a Safer Metaverse: Safeguarding the Virtual World for Women

Pune, Maharashtra | March 8th and 9th, 2022

Amey Ajar, a familiar name to readers, and a star-pupil of S.B. Patil Public School has once again proved himself worthy and deserving of merit by presenting the paper: "Key security challenges for women in Metaverse and Solutions to Overcome Those Challenges". The co-authors for the paper were: Ms. Yogita Ajar and Ms. Priyanka Bagul, both assistant professors of Electronics and Telecommunication at Modern Education Society's College of Engineering, Pune.

The paper stressed on how the Metaverse is the future of the internet, and that upcoming decades will be ruled by the Metaverse. Thus before this technology becomes a necessity for people, it is equally important to make it safe for all sections of society including women. Social media makes women an easy target of cyber bullying, digital frauds and many other issues.

It cannot be denied that the Metaverse is a hundred times more immersive, and this intensifies the need of cyber security for women. In Web 3.0, women have faced critical security issues and it is necessary to improve the Metaverse and make it a safer technology for women to use without the hassle of harassment.

The paper was presented at the International Conference on Gender Equality and Women Empowerment on the occasion of Women's Day on March 8th and 9th, 2022, and will be published in the upcoming issue of the European Journal on Humanities and Educational Advancements (EJHEA).

Congratulations, Amey for once again having got yourself published; a feat accomplished at such a young age. We wish you the very best, and are certain you have in front of yourself a scintillating future paved.
