

From Waste to Wonder: Celebrating Diwali, the Eco-Friendly Way!

Pune, Maharashtra | 17th October, 2025

Students of Grades VIII and IX at S.B. Patil Public School, who are actively part of the Roots and Shoots Programme, showcased their creativity and environmental awareness on 17th October by participating in a Best Out of Waste Diwali Decoration Making Activity. The initiative aimed to celebrate the festive season while promoting sustainability and responsible use of resources.

The students enthusiastically transformed everyday waste materials into vibrant Diwali decorations, demonstrating innovation, teamwork, and artistic flair. Recycled papers, discarded bottles, and other reusable items were creatively crafted into diyas, lanterns, and festive adornments, reflecting the spirit of eco-friendly celebrations.

This activity not only encouraged students to think creatively but also instilled values of environmental stewardship and social responsibility. Through hands-on participation, the young learners realised that sustainable practices can coexist with festive joy, making the celebrations meaningful, colourful, and conscious of the planet.
