

Writing Tomorrow:

AI and the Vision of a Developed India

Pune, Maharashtra | 15th July, 2026

"The best way to predict the future is to create it." In alignment with the visionary CBSE national initiative for the upcoming Independence Day celebrations, the students of S.B. Patil Public School, Pune from Grades IX and X participated in an inspiring classroom essay-writing activity on the forward-looking theme: "Role of AI in Building a Viksit Bharat by 2047."

The activity was designed to encourage our young thinkers to merge national pride with technological innovation, imagining a completely developed India by its centenary year of independence.

Before putting pen to paper, our teachers conducted an in-depth orientation session for the students. Teachers guided the classes through the vast possibilities of Artificial Intelligence (AI) and how it can act as a catalyst for national growth. From revolutionising smart agriculture and accessible healthcare to transforming digital education and infrastructure, the students were given a comprehensive blueprint of a tech-driven India. Armed with these insights, students were asked to research, brainstorm, and come prepared to articulate their unique visions.

The core of the activity took place right inside the classrooms, where the atmosphere was charged with focus and creativity. Under the supervision of their teachers, students penned their essays individually. It was remarkable to see our 9th and 10th graders draft well-structured, insightful arguments. They explored complex ideas such as:

1. Using AI-driven data to help local farmers maximise crop yields.
2. Implementing AI in personalised learning platforms to bridge the rural-urban educational divide.
3. Streamlining public administration and green energy grids using smart technology.
4. Going National: Uploading to MyGov and My Bharat Portals

The activity reached its proud culmination as students took their ideas to the national stage. After fine-tuning their drafts, students successfully uploaded their essays onto the official government platforms—the MyGov and My Bharat portals—just ahead of the 15th July, 2026 deadline.

By submitting their work on these national portals, our students didn't just complete a school assignment—they actively contributed to the national youth dialogue on governance and development. Exceptional entries now stand a chance to win national cash prizes and secure a prestigious e-Invitation to witness the Independence Day Ceremony at the Red Fort!

Through activities like these, our school continues to nurture tech-savvy, responsible citizens who are ready to lead India into its golden era.
